CANDLER Trained McElroy, Champion Class A. Speed 69 wpm.

CHAMPION McELROY, who teaches CANDLER SYSTEM at HARVARD says: "Practice alone, of any kind, will not develop skill and speed. It takes a thorough knowledge of the fundamentals and Mind Training, taught exclusively by THE CANDLER SYSTEM."

CHAMPION JEAN, W3BAK. Two months after beginning Candler training, Jean could copy 30 wpm on her "mill" easily.

LEARN or SPEED UP YOUR CODE with the NEW CANDLER SYSTEM

Trains You to Meet NEW CODE SPEED

Requirements

Those speedy operators you hear on the air are mostly Candler trained. With the Candler System you can improve your operating speed in an amazingly short time right at home.

This system teaches you code by sound, the only correct and accurate way. With only a few hours of practice the Candler way, you will see an amazing development in your performance. In a few weeks' time you'll be pounding brass with the best of them.

IF YOU ARE "STUCK" AT 5, 10, 15 WORDS PER MINUTE

And can't budge beyond that speed, no matter how much you practice, bear in mind *Leading Authorities* say that learning code is *not a matter of mechanics*—of practice alone. It is a mental process that requires *specialized mental training*. Trying to learn code or develop speed by mechanical means is futile as trying to learn arithmetic without a knowledge of the Multiplication Table or electricity without a knowledge of Ohm's Law. You telegraph with your mind. CANDLER trains your mind scientifically to read code by sound as easy as you read print by sight. This accounts for the successes of all Candler trained Amateurs, Com'l ops, and the Champions.

COSTS YOU NOTHING TO GET THE FACTS!

If you want to learn code—RIGHT—or if you are "STUCK" and want to increase your speed for that commercial license and a good job, write today for FREE BOOK OF FACTS: Contains records and pictures of the Champions, how their amazing speeds were developed through Candler Training. All questions answered. NO EXPENSIVE PRACTICE EQUIPMENT NEEDED!

Now! MODEL VT-73

HAS BECOME THE
STANDARD FOR

**VOICE
TRANSMISSION**

LIST

\$25.25

(LESS PLUG)

Accepted as the leader!—in three short months—that's the record of Model VT-73.

The reason is that the level is higher—and the response "weighted" for voice transmission.

Besides, it's a complete microphone—stand, handle, and transmitter—classy looking, too.

That anti-resonant cable, and tight R.F. shielding, eliminates the "bugs."

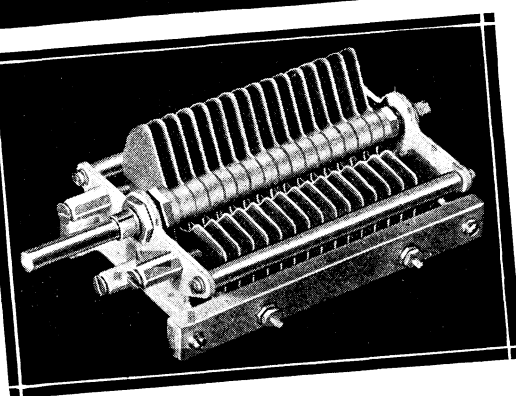

Use it as a desk or hand mike. The head swivels and stays "put" where you want it.

You'll want the full dope on VT-73. Ask your jobber for Bulletin No. 28—or write us.

Expedition
Goes North
with
RME-69
on board!

The Schooner Morissey is on an extended trip to the polar ice regions for the Smithsonian Institute and the Chicago Zoological Society. Contact with the outside world is established through a well designed radio transmitter and an RME-69 Receiver with a DB-20 Preselector. Similar equipment is located at the base in Brooklyn, New York, through which all traffic and expedition messages are handled.

In charge of radio is Operator Clifton Foss, W2OJ, who was at the key on a similar expedition in 1936.

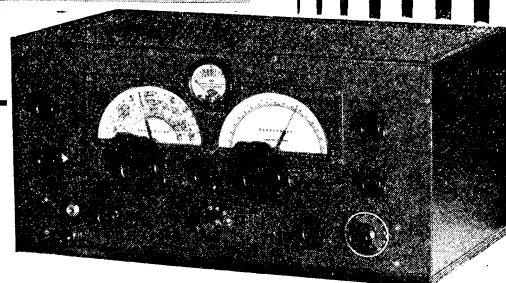

The RME-69 is giving an excellent account of itself whether in arctic or desert regions. There is no job too difficult for a receiver which has the sound engineering behind it found in the RME-69.
